

With the new equipment and properly adjusted wash formulas we significantly reduced energy usage and the costs associated with re-wash.

From Left. Eduardo Fuentes, Eng., Centrax. Martin Leison, Eng., Braun. Carlos Echeverría, Eng., Plant General Manager, IMSS Oriente.

With the acquisition of 4 225 Kg. Braun washers and one loose goods shuttle, we achieved the necessary productivity plus the sanitized service for 49 medical and non-medical units for IMSS South, North and Western Mexico.

We previously had an uncertain and problematic operation affecting medical-surgical units. With the new equipment and properly adjusted wash formulas we significantly reduced energy usage and the costs associated with re-wash.
