After 30 years of reliable performance, I felt it was time to upgrade my wash aisle. Being aware of Braun's certified remanufacturing process, there was no question it was the right thing to do. Their level of commitment to customer satisfaction underscores the company's dedication to standing behind the quality and reliability of their remanufactured products. I've realized a substantial savings as a result of Braun remanufacturing my washers. The full factory warranty for the new washers that also accompany the refurbished washers provides peace of mind. The ability to take the washers offline and reinstall them without any additional installation costs is also a huge savings. I'm pleased with my decision to implement Braun remanufactured equipment into my wash line.
