

# EXPAND YOUR LAUNDRY CAPABILITIES WITH A STRONG, SUPPORTIVE BUSINESS PARTNER

Pictured In Photo Left to Right is Matt Gallagher, Regional Sales Manager, G. A. Braun, and Richard Mayberry, Laundry Engineer, Marriott Marco Island Resort.

“We have had GA Braun as a partner in our Laundry Operation since 2001. For 14 years Braun has supported our equipment and helped us grow.

So when the Hotel announced plans to grow to 810 rooms, we solicited Braun’s help to plan and execute an expansion of the laundries capability.

We had an existing Braun 130lb. tunnel system that has served us very well, and in looking at our options for the expansion we determined with Braun that replacing this system with their new 8 chamber 150lb (clean dry weight) system would allow us to not only take on the added volume, but reduce our operating hours.

Braun’s Project Management Team made sure our delivery and installation went as smooth as possible working with our contractors during a very tight time schedule. The rigging out of

older equipment and the delivery, rigging and installation of the new equipment was executed with a very professional staff. Everything worked like clock work, and the system has operated as advertised since the first day of operation.

The New Braun Tunnel has allowed us to remove a third party Water Re-use / Ozone System Saving Money and Maintenance and allowing us almost 1/2 gallon per lb. washed.

We appreciate our relationship with Braun and look forward to growing our operation together in the future!”
