Jules Constant - Laundry Manager,
Jon Bodrean - Laundry Engineer

The Boca Resort and Club - One of Florida's most luxurious Resorts recently replaced two of their older dryers and installed two new Braun 500PT Gas Fired Dryers for their On-Premise Laundry. The Boca Resort laundry team quickly realized the new dryer production more than doubled and in less floor space than two of the older dryers! In addition to the productivity enhancements with these dryers, we are saving energy, while making the drying process much more efficient!

"Braun made the process worry free! Their team along with our contractors removed the older dryers and lint collectors, re-routed the ductwork and reconnected the equipment over the course of a weekend while coordinating rigging, mechanical and electrical trades for a successful installation with very little down time. Finally, the ROI will successfully pay for the new equipment in less than a two year period!

We are very pleased with the increase in production and greater reliability the new Braun Equipment has brought to our operation. We have used Braun laundry equipment for over 20 years. We are very pleased with their Project Management team and the level of support from their Florida Service Organization!"

David Watson
Director of Housekeeping and Laundry Operations
The Boca Resort and Club
Boca Raton, Florida
