

Hyatt Regency Hotel—Orlando, Florida

We are very pleased with the increase in production, processing flexibility, and greater reliability the new Braun finishing equipment has brought to our operation.

The Hyatt Regency Orlando - One of Florida's top convention Hotels recently installed a new Braun Alpha 1200 Spreader Feeder for their On-Premise Laundry. The laundry team at this major hotel laundry facility quickly realized that this feeder provided quality feeding and complete flexibility to operate with many items including, King Size Sheets, Napkins and Table Linen. The former ironing line was set up for only small items but the feeder gave them the capability to process large items with the push button, and to process small pieces by raising the feed deck to the up position.

The swing down discharge conveyor allows operators access to the ironer for maintenance without having to move the feeder!

"We are very pleased with the increase in production, processing flexibility, and greater reliability the new Braun finishing equipment has brought to our operation." We have used competitive equipment but were very impressed with Braun's capabilities. We are very pleased with the level of support from their Florida Service Organization!
