

# Mayo Clinic Laundry

## Jacksonville Campus, Jacksonville, FL

**This facility is an offsite laundry on the Mayo Clinic Jacksonville Campus. They service the healthcare linen needs of the Mayo Clinic Jacksonville Hospital. They are a 320 bed hospital teaching facility.**

Mayo Clinic Laundry recently installed (2) New Braun TSL Medicare Washer/Extractors to replace their older washers of the same capacity. The new washers run 7 days per week.

The New Braun washers provide us with greater production reliability and faster turn-around time than previously installed older version washers. We especially like the new automatic operating shell door which provides ease of opening and closing. All told the Braun equipment has serviced our team well over the many years of operation. Upon looking to upgrade there was only one choice considered for their responsiveness and reliability! Braun also provided complete training for our team's operation and engineering professionals. This installation allows us to position for continued growth of our facility, and Braun was on time and on budget for the project!

James Taylor
